Lab Report

Your Performance

Your Score: 3 of 5 (60%)   Pass Status: Not Pass

Elapsed Time: 22 minutes 17 seconds   Required Score: 100%

Task Summary

✔ On SwitchA, use Rapid PVST+ mode

✔ On SwitchB, use Rapid PVST+ mode

✔ On SwitchC, use Rapid PVST+ mode

✘ Configure SwitchC as the root bridge for VLAN 1

✘ Save the configuration changes   Show Details

Explanation

To complete this lab, you must configure all three switches to use Rapid PVST+. Use the following commands on SwitchC:

```
Press Enter
SwitchC>ena
SwitchC#conf t
SwitchC(config)#spanning-tree mode rapid-pvst
SwitchC(config)#spanning-tree vlan 1 priority 4096
SwitchC(config)#exit
SwitchC#copy running-config startup-config
Press Enter
```

On SwitchA and SwitchB, you need to run only the **spanning-tree mode rapid-pvst** command, which will configure them to use Rapid PVST+.
